* October 1987 production, ending inventory, and disappearance figures have been changed to agree with United States producer adjustments received after PPI's October 1987 report was published. PPI was notified by the producer of the October errors prior to publication of the December report, and corrections were made in that month's report. Quarterly, calendar 1987 and fertilizer year 1987/88 reports are correct. Corrections will be made in November 1987's disappearance figures and in December 1987's production and disappearance data to make comparisons between current and prior year monthly activity meaningful. (Canadian figures were not affected.)

*Corrections have been made in November 1987's disappearance figures, as well as beginning and FYTD inventory figures reported for that month (North American and United States producer statistics only). October 1987 production, ending inventory, and disappearance figures were changed to agree with United States producer adjustments received after PPI's October 1987 report was published; please see our October 1988 Potash Summary Report for an explanation. Quarterly, calendar 1987 and fertilizer year 1987/88 reports are correct. When PPI's December 1988 Potash Summary Report is published, corrections will be made in December 1987's production and disappearance data to make comparisons between current and prior year monthly activity meaningful.
